Aurum Muretum !

For this purpose you form an
Amalgam of eight parts of Tin
and the same quantity of Mercury
and mix it with six parts of
Sulphur and four of Sal Ammoniac
This Mixture, being exposed to
fire, in an open cucurbit, in-
flames and a delicate sublim-
ate of a golden colour, or Aurum
Muretum is obtained. —

Attestament. Sympathetic.

or Regia Solution of Cobalt possesses
the singular property when diluted with
water and used as an Ink, the letters
are invisible, but appear of a beautiful
green colour when heated, this
Sympathetic Ink is best prepared
by adding culinary to a solution
of Nitrate of Cobalt, for thus the Nitric
Acid is changed into aqua Regia
and the Nitrate of Soda, produced at the
same time prevents the paper from being
eaten.

Abriment. Sympathet.

Squa. Regia dissolves cobalt more
easily than the Marine tho not so
readily as the Nitrous Acid.

This Solution is well known, and
one of the most celebrated Sympathet
inks offered by Chemistry. If the
Diluted with a sufficient quantity of water
to prevent its action upon paper, and
then used to write with, the letters are
invisible as soon as the clear solution
has become dry: but, if the paper be held
to the fire for a short time, they appear
of a fine green colour; which again disappears
by removing it, and suffering it to cool again.
If the heat be continued too long after the
letters appear, it will render them permanent.

Cement

The Cement they make use of is no doubt
that of the Greeks & Romans. -

To make it properly, they take care
only to use the lime when boiling: they
mix with it one third of sand and another
of ashes and powdered brick Dust.

With this composition they form
wells, cisterns, and vaults, which the
water cannot pass through. -

Milk of Roses

Oil of Almonds 2 Teaspoons
Oil of Tartar half a Spoonful
Rose water six Spoonfuls
to be well shaken before
using.

Decoct. Sarsaparilla 9

R. Rad. Sarsaparilla ʒij.

Ag. Fout. libij coque ad libij

To know if a Dog. who dead was
mad. —

Take a piece of Meat ready
dressed, but be sure there be no bones
upon it to stain it, rub the dead Dog
thoroughly with it, and if he
licks off the Meat so a living Dog
which if he refuses, with baying
and howling the Dead Dog was
certainly mad, but if he eats it
he was not mad.

Physician to the general Hospital
at Birmingham

℞. Sol. Digitalis Recent. ℥iv coque in
℥vj. Aquæ libij ad libij. Sumat coch.
mag. ij. he found the present Decoct
produced violent purging & vomiting
which the Doctor says did not by
any means expedite the Cure. The
Result of his Experience both with
respect to purging and giving
to gather the Serum from the flowering
Stem. Was shut up, and about the time
the Menses are coming, &c.

2. To reject the Leaf, Stalk and
Midriff of the Leaves, and to dry
the remaining part either in the
Sunshine or a Tinpan or fluted Dish
upon the Fire. If these dried Leaves
subject to a powder. This now gives
result from one to three grains twice
a Day. Sometimes requires the powder
alone, sometimes he mixes it with
Rheumatism & sometimes forms it in
to pills with a sufficient Quantity
of Scapa Gum Benmoniacum. If
Liquid Medicine be preferred he mixes
℥j of the dried Leaves to be infused, in
Two Hours in half a pint of boiling
Water, adding to the strained Liq^r
℥j of any Spirit. One Ounce of this
Infusion given twice a Day is a
Medicine for an ill Stomach.

That Poison

Take. 1 Quart of white Wine

4 Drops of Oil of Rhodium

4 Dr of Camphire

4 Dr of Amisceds

1/4 grain of Musk

1 oz of Fennigreek

Mix these together, & put
a spoonful on pieces of
board, where they lie
for 3 or 4 nights. Then
mix with the composition
1 oz of white Arsenic & lay
it so before.

They are so powerfully
attracted by the Oil of Rhodium
that they will come from
their holes; and even follow
- on a person who has
it about him.

Doctor Foulers Lithoniptic Pill
Med. Comment L. Vol. VIII Decal 2968

Take Nitron ⁱⁿ (Impurely) powdered coarsely
and expose it to a warm dry air, till it
entirely crumbles into a white powder;
make this powder into pills, with soap or any
other cement; a quantity of soap rather more
equal to the weight of the alkali is nominally
an ointment, extract of peruvian Bark, &c.
may be added if thought necessary.

As many pills may be taken in the
course of a day, as contain from half a scruple
to two scruples of the dry powder. Take
to this extent, our author observes that
they generally afford relief in less than
three weeks; and that in no case but
one, not of more than twenty which
have fallen under my own observation,
have they failed to perform every thing
which could be desired from medicine,
except eradicating the Venereal to
form calculi.

Sizing for Cotton

Boil the cotton first in pure Water
for a quarter of an hour then take it
out and wring it. Then put it into
a new liquor boiling with a pound
of yew, boiled to fraile, one
quarter of an ounce of Combyashes
and two ounces of Alum Let it
boil for an hour this is for
ten pounds of Cotton.

of Cotton

size

For Boaf Tops

Vibronic Acid \mathfrak{zj} Acid: Muriatic \mathfrak{zj}

Juice of three Lemons

powd: Alum \mathfrak{zss} Thin Milk \mathfrak{Hij} .

Put the four first Ingredients
into a Bottle then add the
Milk & shake it well & use
before using it.

NB. Take care that the
Boaf Tops are not kept in
a damp place after being
dressed.

Blackening

Rx. Spar. Vig. ziv. Id. ut oil $\mathfrak{z}\mathfrak{s}$
 Symp. of Buckthorn $\mathfrak{z}\mathfrak{s}$
 Oil of vitriol $\mathfrak{z}\mathfrak{s}$

Whites of two Eggs, Juice of Lemon
 red Ginger 12 pint port wine &c
 Mix the Ivory black well with
 the sweet oil, Symp. of Buckthorn
 & the oil of vitriol & a little of
 the vinegar, then the whites
 of the Eggs well beaten up &
 the Lemon Juice, Next the
 remainder of the vinegar &
 lastly the port wine.
 N.B. Stir it before use.
